## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 and 14-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Hait (US 4,624,238). Hait is considered to disclose the claimed invention comprising:

a collapsible frame **15** for suspending an item above a heat source, the frame comprising:

a plurality of panels **42a-42d**, **32a-32d**, or **90a-90d** forming sides of the frame when the frame is erected, wherein a side of the frame is selectively configured to adjust an attribute of the enclosure including at least one of: how much of the side is enclosed, which portion of the side is enclosed, a position at which a transverse member is supported by the frame, a volume substantially enclosed by the frame and an overall shape of the frame. Hait is also considered to disclose the claimed first panel **32a** detachably coupled to a second panel **42a** and further collapsible, detachably coupled along adjacent edges as shown in figure 4, selectively positionable or employable having particular dimension attributes (column 3 lines 67-68), second dimension measurement different from a first when measure substantially vertical (column 4 line 7), a transverse member **14** supporting an item to be heated including

removably coupled (column 3 line 29) and when coupled performs t least one of:  
maintaining shape of the frame, improving rigidity of the frame and holding in place the  
panels that form the frame (column 3 line 30).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all  
obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148  
USPQ 459 (1966), that are applied for establishing a background for determining  
obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 8-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hait  
in view of Bach (US 6,439,225). Hait is considered to disclose the claimed invention, as  
discussed above under the anticipatory rejection, except for the claimed selective  
configuration. Bach, another device facilitating the heating of items, is considered to  
disclose selective configuration at column 8 lines 5-49. It would have been obvious to  
one skilled in the art to combine the teachings of Hait with the selective configuration  
feature, considered disclosed in Bach, for the purpose of permitting panel removal and  
separate storage to affect the attribute of panel employment in forming a side.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References C-D, cited in this action are considered to disclose one or more features of a device facilitating the heating of items.
